

Dear Student's Name,

I regret to inform you, the medical results from last week's extensive testing are back and the information is not good news. The results from the test confirm that you have a rare terminal illness.

Unfortunately, there is no cure or treatment for this aggressive disease. I have consulted with a team of medical professionals and they agree with the prognosis.

We predict you will live for two weeks or at most two months.

My sincerest apologies,

Dr. Joseph Schmidt, MD
